Education

- **Motihari College of Engineering** — Motihari, Bihar
  B.Tech- Electrical And Electronics Engineering; CGPA: 8.38 — *Nov 2021 - Aug 2024*

Skills

- **Languages**: JavaScript (ES6+), TypeScript, Python, C++, HTML5, CSS3, SQL
- **Frontend**: React.js, Next.js, Redux, Tailwind CSS, Vite
- **Backend**: Node.js, Express.js, FastAPI, REST API, Socket.io, JWT, Mongoose
- **Databases & Cloud**: MongoDB, PostgreSQL, AWS, Azure, Docker, Firebase
- **Tools & AI**: Git, Postman, GitHub Copilot, Claude API, OpenAI API, Prompt Engineering, Agile/Scrum

Experience

- **Tata Consultancy Services (TCS)** — Bangalore, India
  Full-Stack Developer — *Oct 2024 - Present*
  - Developed full-stack applications using **React.js**, **Redux**, **Node**, and **Express**; built **15+ RESTful APIs** with **JWT** authentication, improving application performance and user experience.
  - Built and maintained backend services for an enterprise **AI-powered chatbot platform** using **Python** and **FastAPI**, handling request routing, third-party API integrations, and production issue resolution.
  - Optimized **MongoDB** queries using indexing and aggregation pipelines, improving data retrieval latency; integrated **Azure** for cloud hosting and containerized deployments with **Docker**, reducing manual deployment effort.
  - Established **CI/CD pipelines** via **GitHub Actions** to automate application builds, testing, and deployments; contributed to **Agile/Scrum** sprints and production releases.

Internships

- **Service Hive** — Part-time
  Software Developer Intern — *Feb 2024 - Apr 2024*
  - Migrated **Perfex CRM** from **PHP** to **MERN Stack** on a module-by-module basis, improving codebase maintainability by **40%** and reducing server response time by **30%**.
  - Designed and implemented **15+ RESTful APIs** with **Express.js**, built responsive **React.js** UI components, and structured **MongoDB** schemas replicating **100%** of existing Perfex CRM functionality.
  - Collaborated with **5+ developers** in Agile daily stand-ups, contributing to sprint planning and on-time delivery of **3 CRM modules** within a **3-month** timeline.

Projects

- **DevTinder**: **Next.js 14, TypeScript, Redux Toolkit, Socket.io, Razorpay, Redis** Live | GitHub
  - Migrated a full-stack developer networking platform from React/Vite to **Next.js 14** with **TypeScript**, featuring swipe-based matching and real-time chat; deployed serving **500+ users** with **99.9%** uptime.
  - Integrated Redux Toolkit with typed slices for state management; implemented JWT auth with HTTP-only cookies and bcrypt hashing, improving authentication security and login performance.
  - Built real-time messaging with typing indicators and edit/delete via **Socket.io** (100+ concurrent connections); integrated **Razorpay** with webhook verification for **100%** transaction reliability.
  - **Configured Redis via Docker for caching/sessions** and implemented a clean Git branching workflow to improve application performance and development workflow.

- **Study Notion**: **React.js, JavaScript, Node.js, MongoDB** Live | GitHub
  - Built a full-stack **MERN** Ed-Tech platform with **3 role-based** access levels (student, instructor, admin), supporting **500+ course enrollments** and improving user engagement by **30%** through optimized UI/UX workflows.
  - Integrated **Razorpay** payment gateway with server-side webhook verification ensuring **100%** transaction accuracy; secured routes using **JWT** authentication and HTTP-only cookies across all **3 user roles**.
  - Developed instructor dashboard for course creation, content management, and analytics - increasing instructor workflow efficiency by **20%**; designed interactive modules with progress tracking, boosting course completion rates by **25%**.
  - Optimized **MongoDB** schema for course, user, and progress data with **Mongoose** ORM; reduced page load time by **35%** and improved student retention by **30%** via personalized learning flows.

- **Jobify**: **React.js, Node.js, Express.js, MongoDB** Live | GitHub
  - Built a full-stack **MERN** job tracking platform with **CRUD** operations and centralized dashboard - managing applications by status (Applied, Interview, Declined), reducing management time by **40%**.
  - Implemented application categorization, filtering (status, type, location), and automated deadline reminders - cutting missed deadlines by **40%** and boosting interview callback rate by **30%**.
  - Designed **RESTful API** with **Express.js** and **MongoDB** for persistent data storage; secured endpoints with **JWT** authentication and built responsive **React.js** dashboard with real-time status updates.
